

The Canadian Sports Concussion Project Presents

2nd Annual Symposium: Research on Concussion Spectrum of Disorders

Saturday, January 11th, 2014

8:00 AM - 5:00 PM

Toronto Western Hospital – Auditorium 2-401 West Wing

You are invited to attend the second conference hosted by the Concussion and CTE team at The Krembil Neuroscience Centre. The invited speakers from the Project Team and from other research groups will be making presentations on the clinical, neuropsychological, neuroimaging and neuropathological manifestations of the concussion spectrum of disorders including acute concussion, post-concussion syndrome, second impact syndrome, emotional consequences of concussion, and the occurrence of major brain degeneration including chronic traumatic encephalopathy (CTE). This conference will cover the latest research developments in this field. Researchers from across Canada are invited to attend. There is no registration fee.

Program Highlights

- The Importance of Concussion Research for CFL Retired Players
- Messages from the International Consensus Concussion Conferences
- Initial neurological, neuropsychological, and MRI findings from UHN-TWH Concussion Studies
- The Presence/Absence of CTE in Retired CFL Players at Autopsy
- The MEG Project Plans
- PET Scanning for CTE
- The CIHR Project on Heart Rate Variability in Concussion
- Post Concussion Syndrome in Athletes
- Findings from Concussion Studies at other Ontario Institutions
- MEG & PET technology for Concussion
- Concussion Incidence and Prevention in contact sport
- Concussion Guidelines
- Experiences of Pro-Athletes

If you wish to attend, please reply by email to Concussion.Symposium@uhn.ca by Jan 1, 2014 to reserve your seat.
